### DEPARTMENT OF MECHANICAL ENGINEERING

#### REPORT ON Career Counseling

Global Institute of Engineering and Technology had conducted “**Industry Perspective for Mechanical Engineering**” by Mr. Mohammed Iftekharuddin, KG Mech Electro Mechanical, Pvt. Ltd. Hyderabad in our college premises on 19/01/2015. Principal introduced the Special guest Mr. Mohammed Iftekharuddin and Guest delivered value added speech and suggestion to build excellent life.

Career Counseling and an Entrepreneurship Development Program Special guest Mr. Mr. Mohammed Iftekharuddin

Students have a lot of decisions to make while they're in college. These range from which courses to take up apart from their core subjects, to deciding which internships would benefit their career. However, the single biggest decision that any college student needs to make revolves around what to do after college. As a matter of fact, almost every other choice that a student makes in college revolves around his/her plans after college, be it studying further or taking up a job. Deciding what to do after college has a significant impact on your immediate future as well as long term goals. This decision gets difficult because there are several factors that impact it, such as interests, costs, opportunities etc. For example, you might realize while pursuing your degree that your true passion lies somewhere else, and you might decide to pursue a career in that field after college. But what if

PRINCIPAL  
Global Institute of Engineering & Technology  
Chilkur (V), Moinabad (M), R.R. Dist. TS.

that career requires you to pursue a separate course after your graduation, something that you're not willing to do?

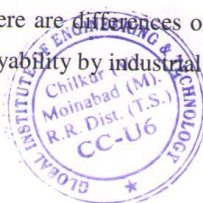

To ensure that you don't make a wrong a decision at this crucial juncture in your life, it helps to consult a Career Counselor. A Career Counselor will guide you through this whole decision making process and will give suggestions that are beneficial for you with regards to whether you should take up a job after college or pursue a postgraduate course.

Additionally, a Career Counselor will also help in developing contingency plans in case things don't work out (not getting admission in the desired course or not getting a job etc.).Not only that, but he/she will also help you make decisions in case you wish to alter your career goals after college. In such scenarios, a Career Counselor will help you decide whether it is worth it to completely change your career focus or not, and if yes, then should you first take up a course in that career or directly apply for a job.

### *Objectives of the Industry Perspective for Mechanical Engineering*

#### **Primary Objectives:**

- To determine whether the application knowledge of theory into practice is a factor in employability of mechanical engineering graduates as perceived by the employers and is it significant from employers perspective.
- To quantify the gap between expectation vs availability of mechanical engineering students' knowledge in applying theory to practice as perceived by the employers.
- To identify the importance of soft skills and the factors that influences the soft skills as perceived by employer towards practical application.
- To identify the importance of analytical and problem solving skills and the factors influencing them as perceived by employer towards practical application.
- To identify the importance of Quality knowledge, application tools and the factors significant to them as perceived by the employer towards practical application.
- To identify the factors that are significant in applying mechanical engineering domain knowledge to the practice as perceived employers.
- To determine whether there are differences on the perceived views on the factors of this study to the employability within the regions of India.
- To determine whether there are differences on the perceived views on the factors of this study to the employability by industrial segments

  
Principal  
Global Institute of Engg. & Tech  
Chilkur (V), Mojnabad (M)  
R. R. Dist

**Secondary Objectives:**

- To identify whether, employability issue of mechanical engineering graduates is across institutions as perceived by the employers.
- To quantify the employer perception of infrastructure, industry institution interaction and its influence on applying theory to practical application
