Hyderabad.

COURSE COMPLETION CERTIFICATE

This is to certify that the main-project work titled "CASE STUDY ON CABLE STAYED BRIDGE" by
SAFIQUL ALAM (10U61A0143) student of GLOBAL INSTITUTE OF ENGINEERING AND TECHNOLOGY
(GIET) in partial fulfillment for the award of the degree of B.TECH in Civil Engineering and is a record of bonafide
work carried out by him in our organization during the period 06/01/2014 – 30/03/14

His performance in this period is satisfactory.

REPORT OF INDUSTRIAL VISIT

Coromandel Cement Factory- Cement Corporation of India Ltd

P.O: CCI TANDUR, Telangana 501158

Visit Date: 27 October 2015

Students Visited Coromandel Cement factory Tandur, one of India's premier cement makers, in which they learned the process of cement formation and also discussed the marketing Finance and HR related aspects of the company. It took almost 3 hours to visit the industry which was followed by questions of students. Students got a chance to transfer their theoretical knowledge to practical implication.

Mr. Sandeep HR head and Mr. Pramod gave us deep insight about the technical and non technical aspects. The hospitality given by the factory staff was tremendous and overwhelming.

Cement Manufacturing Plant- Tandur

Manufacturing of cement-process description along with Mechanical equipments:

Lime Stone Crusher: The crusher is meant for crushing the limestone from one meter size to less than 10mm. Crushing process consists of primary crusher followed by secondary crusher. Primary crusher, secondary crusher consists of vibrating screens .They act as sieves. Primary crusher crushes the limestone from one meter size to 70mm. Secondary crusher is meant for further crushing of lime stone from 70mm to less than 10mm. room, feeding hoppers, feeding equipment, conveyors ,galleries, plat forms, hand railing, deducting equipment, foundation etc

Raw Mill & Ball meal preparation:

Raw mill is a ball mill meant for grinding the limestone, laterite and iron ore of size below 10mm to less than 212 micron size this powdered material is called "raw meal" and is transported to storage silo. The raw material preparation process is consisting of feed hoppers, conveyers, support for conveyers, control room, bucket elevators, fine particle separation equipment, platforms, separators etc.

Blending silo & kiln feed extraction system:

Storage silo is of concrete construction meant for storage of the raw meal powder produced by raw mill and also facilitate blending through aeration system to homogenize and maintain consistent quality of raw meal. Homogenized raw mill from the silo transported to kiln feed bin. From kiln feed bin the raw mill conveyed to the top of pre heater through belt conveyor.

Rotary kiln: Kiln is a long, steel tubular structure with refractory lining and is placed on support rollers to rotate at required speed. The hot material is heated in pre heater up to 900 degrees enters in to kiln inlet. The kiln will be in rotating condition with controlled speed and with pumping of fine coal and air from outlet of kiln. The entered hot material is converted at 1350-1400 degrees to clinker after passing through various phases

After completing the visit, Students had an exposure to various phases that cement undergoes before manufacturing. Students were explained about

1. **Manufacturing process**
2. **Batching**
3. **Packing of cement**
4. **Quality testing of cement**
5. **Air quality measurement in the plant**

Students found this method very useful and they were able to gather a lot of information about the cement manufacturing Process.

REPORT OF TECHNICAL VISIT

National Institute of Rural Development and Panchayati Raj,

Rajendranagar, Hyderabad - 500030, Telangana, INDIA

Visit Date: 03/10/2016

The National Institute of Rural Development and Panchayati Raj (NIRD&PR), an autonomous organisation under the Union Ministry of Rural Development, is a premier national centre of excellence in rural development and Panchayati Raj. Recognized internationally as one of the UN-ESCAP Centres of Excellence, it builds capacities of rural development functionaries, elected representatives of PRIs, bankers, NGOs and other stakeholders through inter-related activities of training, research and consultancy.

The Rural Technology Park of National Institute of Rural Development and Panchayat Raj, Hyderabad has been established with a view to uplifting the rural people in all aspects of life such as capacity building, rural employment generation and livelihood etc. It is established in an

area of 65 acres of land with a scope to envisage for transfer of technology through live demonstrations. The development of RTP has been divided into various categories to cater to the needs of the rural people.

- (i) Rural Development Philosophy, Concepts, Principles, Policies, Programmes and Organisations
- (ii) Rural Development Management Practices, and
- (iii) Rural Social Sector.

The Visit consisted of three major components, namely,

- (a) Classroom teaching and interactive learning
- (b) Visit to Various Construction Technologies
- (c) Field Attachment (Rural Organisational visit).

The visit envisages exposure to attitudes, skills and knowledge relevant to the rural society, rural development philosophy and concepts, and rural development management theories and practices.

Students were given a deep insight of various construction technologies and introduced local rural handicrafts. They were familiarized with the construction methods in different zones of India

REPORT OF TECHNICAL VISIT

National Geophysical Research Institute

Uppal Road, Habsiguda, Hyderabad, Telangana 500007

Visit Date: 14/02/2017

Established in 1961, CSIR-NGRI has made an indelible mark on the geoscience landscape in India through its research and innovation by dedicated scientists.

NGRI has several contributions on understanding of the knowledge about the Earth's structure, dynamics and resources.

Students were introduced interdisciplinary geoscientific exploration, to address challenges of water, energy and geological hazards.

Students had the opportunity to meet officials who initiated paradigm change driven science to mission mode projects, which are based on inspired research approach i.e. seeking answer for fundamental scientific issues, and finding science solutions aimed at immediate use for society.

Students were given a deep insight of

The research activities investigating and modeling fundamental aspects of the Earth system and processes at NGRI

Earthquake Hazards, which encompass features on the surface and subsurface of crust which may potentially endanger lives and properties through catastrophes like earthquakes and landslides as well as deterioration in pollution levels of groundwater and soil, changes in climatic conditions and associated environmental issues.

Institute's modern computational and analytical facilities

State-of-the-art field geophysical equipments, which enable scientists to design experiments, test hypotheses and validate them, in order to explore earth's interior, particularly the Indian subcontinent.

Students were explained about

The crisis arising due to ever decreasing availability vs. increasing demand for water, energy and minerals and growing concern about geohazards and potential catastrophes, obviously place earth science research at the forefront of human enquiry.

- 1) A close explanation was given on Earth processes and its intersections with the growth and development of the human society.
- 2) Strategies to minimize loss of life and property from natural disaster as well as manage water, energy, and mineral resources for enhancing the quality of life.
- 3) NGRI mandate to conduct research for public-good science to enable government agencies, public and private sector stakeholders to make informed decisions about use of geo-resources sustainably and improve preparedness and resilience to natural hazards.

INDUSTRIAL VISIT TO MOTHER DIARY

An industrial visit to Mother Diary, has been organized by Global Institute of Engineering and Technology, for 65 students of B.tech on 15th October 2017 who were accompanied by 15 faculty members.

The objective of the visit was to provide a technical exposure to the students about manufacturing process of milk and details of various machinery how its work. the visit not only provided a good insight into the quality of research happening in the machinery, but also gave great exposure to the student about the research in sciences.

Summary of The Visit:

One bus with students started from GIET at 09:30am on 15/10/2017 and reached to the mother diary site at 11:00 am. After reaching students were visited different manufacturing units like production unit, testing unit, packing unit at around 4:00pm, we return back to college and reached by 05:30 pm to college.

We (All students and staff members) are very much thankful to the Management, Dean & Principal of Global Institute Of Engineering and Technology.

We are also very much thankful to our staff for their co-operation during the visit.

REPORT OF TECHNICAL VISIT

Hyderabad Metro Rail

Inner Ring Rd, Survey Colony, Industrial Development Area, Uppal, Hyderabad, Telangana 500039.

Visit Date: 27/03/2018

The Hyderabad Metro Rail Project is the World's Largest Public-Private Partnership Project (PPP) in the Metro Sector. The Metro Network will cover a total distance of around 72 Km across three corridors, transporting Hyderabad to the future.

Hyderabad Metro Rail Project is the World's Largest Public-Private Partnership Project (PPP) in the Metro Sector. Metros and MRTS (Mass Rapid Transport System) are emerging as a major area for infrastructure development in major cities with high population (around 8 Million). The Metro Rail Project, once completed will transform Hyderabad as the preferred city in India; with integrated urban transport planning using inter modal connectivity and convenient sky-walks, which will mark the beginning of an era of seamless commuting in India.

The Hyderabad Metro Rail Network will cover a total distance of around 72 Km across three corridors:

- Corridor I : Miyapur to LB Nagar
- Corridor II : JBS to Falaknuma
- Corridor III : Nagole to Shilparamam

The Project will be integrated with existing railway stations, suburban railway network (MMTS) and bus stations to ensure seamless and comfortable travel.

Hyderabad Metro Rail (HMR) is a 'green' transportation system which will reduce carbon footprint through efficient power consumption, rainwater harvesting and other processes. Every time you ride with us, you contribute to the development of an eco-friendly environment

The three depots planned in 72 km rail network of Hyderabad Metro Rail are located at:

- Miyapur for Corridor 1 (Miyapur –LB Nagar)
- Falaknuma for Corridor 2 (JBS – Falaknuma)
- Uppal for Corridor 3 (Shilparamam – Nagole)

The Uppal depot is the main depot cum workshop where the overhaul and corrective maintenance facilities for whole fleet are planned. The other two depots have basic facilities for scheduled preventive maintenance and minor corrective maintenance.

The maintenance workshops are managed by a team of managers who plan, coordinate and manage various activities in depot to ensure that the trains are well maintained and cleaned for daily passenger service.

Major facilities Explained to the students in the depots are:

- Automatic train wash plant
- Inspection and workshop bays
- Offices
- Depot control center
- Covered & open Stabling lines
- Infrastructure maintenance facilities
- Electrical & Mechanical workshops
- Electronic repair shops
- Open and outdoor storage facilities
- Wheel profiling lathe
- M&P for repair & overhaul
- Training, conference rooms, Cafeteria etc.

REPORT OF INDUSTRIAL VISIT

NH-163 – Telangana – Chattisgarh

Visit stretch -Warangal to Hyderabad & L&T Office- Warangal

Visit Date: 15/10/2018

This project is undergoing in Warangal. National Highway 163(previously NH 202) is a National Highway in India that links Hyderabad in Telangana and Bhopalpatnam in Chhattisgarh length calculated about 280 kilometers, in which the stretch in Telangana is about 244 kilometers and in Chhattisgarh 36 kilometers, road till Warangal was already a State Highway. It was extended and upgraded to a NH as the shortest route to connect Chhattisgarh to an important city.

The cost is estimated to be Rs.1905.23crore including cost of Land acquisition, resettlement and rehabilitation and other pre-construction activities. The main objective of the project is to improve the infrastructure in Telangana and also in reducing the time and cost of traffic, particularly heavy traffic, plying on Yadgiri-Warangal sector. After four laning of this stretch, the whole stretch from Hyderabad to Warangal would be four-lane.

Students Observing the Laying of CC Road using Advanced Auto Paver

The development of this stretch will also help in uplifting the socio-economic condition of the concerned region of the state and would also increase employment potential for local labors for project activities. The project is covered in the 3 region of Yadgir and Warangal.

Students are exposed to the challenges in NHAI Construction. New technologies for setting alignment of National Highway. Construction of RCC Roads using advanced Auto Paver Machine.

REPORT OF TECHNICAL VISIT

Visit to Eesavyasa Technologies Pvt. Ltd

Shed No 79, Phase 3 SVCIE, Industrial Development Area Road, JDA, Balanagar, Hyderabad,
Telangana 500037

Visit Date: 19/01/2018

Eesavyasa is an advanced Research and Development centre for large Corporate and Government establishments in the areas of Water Treatment, Industrial Power Reduction, Agriculture and Aquaculture.

**Civil Engineering Students got exposure on Advanced
Water Treatment Technologies**

Advanced Treatment Technology Units:

1) Nano EMRION Community Water Treatment

- Bacteria/Virus + Heavy Metal Removal
- Treats surface and ground water
- Embedded Software
- Treats unlimited quantity (multiple MLDs)
- Uses 75% less power
- Requires minimal manual intervention
- All-Purpose water for all utilities

2) Nano EMRION Sewage Treatment

Bacteria/Virus + Heavy Metal Removal

- Water fit for utilities & industrial consumption
- Requires 80% less installation space
- Can even be mounted on a vehicle for mobility
- Embedded software
- Transmits quality parameters (SMS/email)

- No aeration required
- Treats unlimited quantity (multiple MLDs)

3) Aquoze Consumer Water Treatment

- Ozone-based treatment
- Leaves no toxic by-products
- Removes Bacteria/Virus
- Removes Heavy Metals
- Bulk treatment (up to 5000 ltrs/day)
- Unmatched Input-Output Ratio
- No Pre-treatment Needed

SAADVI CONSTRUCTIONS PVT LTD

Flat No. 88-44-2/6,
Panjagutta, Hyderabad 500003

TO WHOM SO EVER IT MAY CONCERN

This is to certify that, Ms. G. POOJA Student of Civil Engineering from "Global Institute of Engineering & Technology" With Roll No. 16U65A0103 Has Successfully Completed His Summer Internship Programme From 17/04/2018 to 17/05/2018 on 'Design of Pile Foundation', at SAADVI CONSTRUCTIONS Pvt. Ltd, Panjagutta, Hyderabad.

He is majorly involved in an activity of Project design and analysis. During the period of his internship program with us, He had been exposed in different process and was punctual, hard working and inquisitive.

SWe wish all success and well place in her life.

SAADVI CONSTRUCTIONS Pvt.

Project Manager
