### CIRCULAR

The Department of Computer Science and Engineering is conducting a seminar on 'Growth Mindset' for the students of 2<sup>nd</sup> & 4<sup>th</sup> year B.Tech on 27-02-2016 in Dr. Hasanuddin Ahmed Auditorium. All the students of 2<sup>nd</sup> & 4<sup>th</sup> year B.Tech are hereby informed to Attend the Seminar. Attendance is mandatory so everyone must attend.

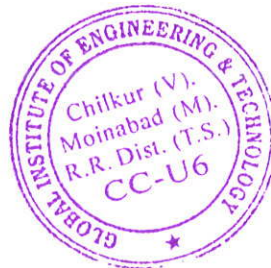

The Coordinator for the course is Mr.Syed Mazharuddin, Assistant Professor, Department of CSE.

To

The Principal  
GIET

Respected Sir,

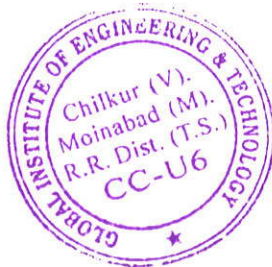

Sub: Permission to Conduct a Seminar on Growth Mindset– Reg.

The Department of Computer Science Engineering is planning to Conduct a Seminar on Career Planning Process on 27-02-2016. As Choosing a career is a big deal.A substantial portion of our life will be spent pursuing our career so we certainly do not want to underestimate the importance of selecting a career that is a good fit for us. In making this personal decision there are a few key things to consider. To increase the chances of finding a satisfying career, Students should have the knowledge of career Planning Process. I would like to request for your permission and support to conduct the Seminar. It will be ensured that information delivered to students is standardized.

Kindly accord approval so as to make necessary arrangements for Conducting a One Day Seminar on Career Planning Process.

Thanking you.

**A REPORT  
ON  
A ONE DAY SEMINAR  
GROWTH MINDSET**

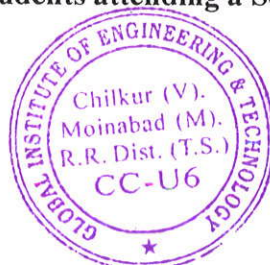

Global Institute of Engineering and Technology had Seminar on Seminar on Growth Mindset Process on 27 Feb 2016. Mr. Satya Narayana Principal introduced the resource person Mrs, Sneha Agarwal Senior Consultant from Pegasus Solutions.

She starts with the Introduction to Growth Mindset where Growth mindset is the idea that, with effort, it's possible to increase intelligence levels, talents, and abilities. Students who demonstrate a growth mindset believe their abilities develop over time, tend to seek out opportunities to gain new knowledge and broaden their skills, and do not typically shy away from challenges

She compared Growth Mindset and Fixed Mindset, fixed mindset is the belief that intelligence and talents are static, leading students to believe that their potential for success is based on whether they currently possess the required abilities. These students are often tempted to give up when things get hard—they may run from challenges, see mistakes as failures, or approach success differently to their classmates with a growth mindset.

**Second and Final Years Students attending a Seminar on Growth Mindset**

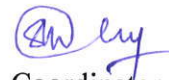

"Students who possess a fixed mindset are often preoccupied with the notion of high performance and will seek opportunities where they can prove their skills while avoiding situations where their weaknesses might be revealed." In contrast, students with a growth mindset believe that they can learn to complete tasks, solve complex problems, or grow their intelligence, rather than assuming they "can" or "cannot" do something based on their current abilities. Having a growth mindset is essential to lifelong success, and it is something that students can develop with practice.

She mentioned Six Important points for the students to develop Growth mindset.

1. Read books with characters who face challenges and develop strategies to overcome them.
2. Participate in activities that gives the chance to practice phrases that promote growth mindset
3. Display visible reminders of growth-mindset vocabulary using inspirational posters and bulletin boards
4. Should focus on the questions after the class.
5. Using prompts that facilitate a growth mindset
6. Model growth mindset as an educator

The seminar was attended by 32 students of CSE Department.
