REPORT ON Career Counseling

Global Institute of Engineering and Technology had conducted “**Selection of Project Topic**”. By Dr. Uday Kiran Chawan, Principal, Bhaskar College of Engineering, Hyderabad. in our college premises on 22/01/2018.. Principal introduced the Special guest Dr.Uday Kiran Chawan and Guest delivered value added speech and suggestion to build excellent life.

Career Counseling and an Entrepreneurship Development Program Special guest Dr.Uday Kiran Chawan

Students have a lot of decisions to make while they're in college. These range from which courses to take up apart from their core subjects, to deciding which internships would benefit their career. However, the single biggest decision that any college student needs to make revolves around what to do after college. As a matter of fact, almost every other choice that a student makes in college revolves around his/her plans after college, be it studying further or taking up a job. Deciding what to do after college has a significant impact on your immediate future as well as long term goals. This decision gets difficult because there are several factors that impact it, such as interests, costs, opportunities etc. For example, you might realize while pursuing your degree that your true passion lies somewhere else, and you might decide to pursue a career in that field after college. But what if that career requires you to pursue a separate course after your graduation, something that you're not willing to do?

To ensure that you don't make a wrong a decision at this crucial juncture in your life, it helps to consult a Career Counselor. A Career Counselor will guide you through this whole decision making process and will give suggestions that are beneficial for you with regards to whether you should take up a job after college or pursue a postgraduate course.

PRINCIPAL
Global Institute of Engg. & Tech
Chilkur (V), Moinabad (M)
R. R. Dist

Additionally, a Career Counselor will also help in developing contingency plans in case things don't work out (not getting admission in the desired course or not getting a job etc.). Not only that, but he/she will also help you make decisions in case you wish to alter your career goals after college. In such scenarios, a Career Counselor will help you decide whether it is worth it to completely change your career focus or not, and if yes, then should you first take up a course in that career or directly apply for a job. Our goal is to nurture the talents of the students, empowering graduates who will flourish and change the world for better.

The project and your employment prospects:

Undertaking a project can be challenging and exciting. It is challenging because a tremendous amount of self-discipline, time and effort needs to be put into it. It is exciting because a successful project rewards with great satisfaction and experiential learning. The project requires the amalgamation of different kinds of skills: problem solving, studying and communication, both written and spoken. It stretches your ability to limits you never thought possible. It gives you something you can talk about knowledgeably and enthusiastically to prospective employers. Projects are a great opportunity for you to demonstrate your creative abilities and independence. The project is an excellent indicator of a student's overall ability to carry out a serious piece of work, and therefore employers are impressed by a well executed project.
