Madam,

Sub: Permission to Conduct Bridge Course for Students of ME-III Semester reg.

\*\*\*\*\*

This is to get it to your kind notice that we Department of Mechanical Engineering are interested to conduct a Bridge Course On **Internet Of Things (IoT)** to the students of ME-III Sem from 9/07/2018 to 13/07/2018, which is undertaken for students benefit as a value addition to curriculum of course.

These classes help students to strengthen their basics and bridge gap between intermediate and engineering. These classes give them a brief idea of Mechanical Engineering.

Kindly accord approval so as to make necessary arrangements for conducting the classes for students of Mechanical Engineering -III Sem - Academic Year: 2018-19.

Thanking you.

### OFFICE ORDER

Sub : Appointment of Coordinator for Bridge Course Students of ME-III-Reg

This is to state that **Mr.V Sai Chandra** is appointed as Coordinator for Bridge Course Classes for students of Mechanical Engineering- III Sem from 9/07/2018 to 13/07/2018. Further you will be responsible for checking the status of classes, strength of students and Syllabus coverage status and all other issues related to the conduct of classes.

It is here by informed to take charge immediately and initiate the work accordingly.

Respected Sir,

**SUB: Invitation as a Speaker for Bridge Course on 'Internet Of Things (IoT)'-Reg  
Academic Year: 2018-19**

\*\*\*\*\*

Global Institute of Engineering and Technology is a self financed Non-Minority Institution established in the year 2006 with a vision to promote quality education.

Global Institute of Engineering and Technology is managed by Madina Education and Welfare Society which is a four decades old society. Global Institute of Engineering and Technology offers B.Tech in Civil Engineering, Electrical and Electronics Engineering, Electronics and Communication Engineering, Mechanical Engineering, Computer Science and Engineering and Masters in Embedded Systems, Electrical Power Engineering, Computer Science and Engineering, Structural Engineering and MBA. GIET is also approved Nodal Center for running skill development courses under Pradhan Mantri Kaushal Vikas Yojana.

It is to humbly invite you to Speaker for Bridge Course on 'Internet Of Things (IoT)'--in the Institution for our students of ME-III Sem, which is undertaken for students benefit as a value addition to curriculum of course.

I on behalf of the students of department of Mechanical Engineering request you grace the occasion as Speaker on 09/07/2018 to 13/07/2018 At College Campus Moinabad to take a Session on **Internet Of Things (IoT)**.

It is humbly requested to accept our invitation.  
Thank you for your time and consideration.

About Bridge Course: The Bridge Course is aimed to act as a buffer for the new entrants, with an objective to provide adequate time for the transition to hard-core engineering courses. During this interaction of bridge course week with the faculty and their classmates, the students will be equipped with the knowledge and the confidence needed to take on bigger challenges as future engineers of this country.

Objectives:

- To act as a buffer for the new entrants.
- To provide adequate time for the transition to hard-core engineering courses.
- Focus on fostering a strong sense of ethical judgment and moral fortitude.
- Applications based self-learning and intermingling of a large cross section of students from vastly varying backgrounds.
- A breather, to prepare themselves before courses for first year engineering commence.
- The students will be equipped with the knowledge and the confidence needed to take on bigger challenges.
- Nurture a deeper understanding of the local and global world and our place in it as concerned citizens of the world.
- Interactive and Active Learning by Doing have been weaved into the Bridge Course.
- Active learning with the help of other students

# Chapter 1

## Introduction

Government provides food, oil and fuel to economically challenged people at subsidized rates which are distributed to the public through ration shops. The stocks for these ration shops will be bought from the farmers and then sold at subsidized rates. Every month fresh stock arrives at these shops and that needs to be distributed to public. The owner of most of the ration shops resort to malpractices and the allotted amount of ration is not distributed to authorized people. To counter these fraudulent activities this system is developed which incorporates the following features.

1. Fingerprint authentication system used to identify a particular user making the system secure.
2. The commodity and its quantity need to be selected using android application.
3. Predefined information about the amount of ration to be distributed.
4. Automatic ration distributing mechanism.

Public distribution system in the country has undergone organic changes from the rationing system introduced during World War II to an important social safety program to ensure food security of the country. Under the public distribution System (PDS), the central government procures and supplies special essential commodities to fair price at fixed central issue prices. In the past, a number of items like iodized salt, palm oil, candles, ghee, cloth etc. have been distributed through the PDS, however at present department of food and supplies have confined the fair price distribution to few cereals, wheat, rice, sugar and kerosene oil. At present India has 4,78,000 ration stores operating across many localities, villages, towns and cities in the country making it the largest distribution network in the world. Department of food and supplies is providing ration cards to the citizens based on their economic conditions. There are mainly two types of cards:

1. Below poverty line (BPL) cards
2. Above poverty line (APL) cards

---

Against the essential commodities act there are many fraudulent activities going on unfair price shops. Users are forced to wait in long queues for hours together to purchase the essential commodities. Card holders and their family member's details are stored in a notebook. Hence each time transaction is made by the card holder, entry had to be made manually in the book. Maintenance of record in book is difficult. Thus, an efficient and automated system is required to minimize the misappropriations.

Quantity of ration to be given for these cards is fixed based on the number of members in the card holders family. The Department of food and supplies enforces control over these provisions under the orders by the Essential Commodities Act, 1955 regulating trade in specified essential commodities by keeping a close watch on stocks, passage, quality and availability of these commodities. Enforcement consists of collection of information and evidence of contravention of provisions of the relevant control orders and action taken against them under the provisions of Essential Commodities Act.

### **Objective and Motivation of the project**

The aim of this system is to build an automatic and convenient system to protect the interests of the public by countering the malpractices. The main purpose of the system is to implement fingerprint matching algorithm for authentication of the user, which in turn reduces the widespread corruption, misuses of cards and to reduce the time complexity of the manual data entries. The system is used to protect the products of fair price shop in black markets.

### **Organization of the report**

Chapter 2 deals with the literature survey. The block diagram of the system is explained in Chapter 3, giving an overall view of the techniques used in the system. Chapter 4 deals with System hardware and Chapter 5 with system software and flowcharts. Chapter 6 contains result which is explained through snapshots and quantity analysis. Chapter 7 contains conclusion and scope for future work.
